Art Unit: 1774

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a carbon fiber, classified in class 428, subclass 367.
- II. Claims 6-10, drawn to a product by process, classified in class 423, subclass 447.1+)

The inventions are distinct, each from the other because:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I require diameter, aspectio and R value while group II does not (different mode of operation and different effects).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Sheldon Landsman on 5/3/04, 5/6/04, and 5/10/04, however, was no response.
